

CHECKLIST ENVIRONMENTAL ASSESSMENT

Project Name: Lease #3502 – Water Development	Proposed Implementation Date: Spring 2008
Proponent: Susan Anderson, Surface Lessee, P.O. Box 217, Dupuyer, MT 59422	
Type and Purpose of Action: The surface lessee has requested permission to install a water cistern, buried water pipeline and 2 water tanks on state land for livestock water purposes. The water source is from an existing well located on state land.	
Location: Sec 20, 16, T28N, R7W – Common Schools	County: Pondera

I. PROJECT DEVELOPMENT

1. PUBLIC INVOLVEMENT, AGENCIES, GROUPS OR INDIVIDUALS CONTACTED: Provide a brief chronology of the scoping and ongoing involvement for this project.	Susan Anderson, Surface Lessee
2. OTHER GOVERNMENTAL AGENCIES WITH JURISDICTION, LIST OF PERMITS NEEDED:	There are no other agencies with jurisdiction on this project.
3. ALTERNATIVES CONSIDERED:	Approve the water development. No action. Do not approve the requested water development.

II. IMPACTS ON THE PHYSICAL ENVIRONMENT

RESOURCE	[Y/N]	POTENTIAL IMPACTS
		N = Not Present or No Impact will occur. Y = Impacts may occur (explain below)
4. GEOLOGY AND SOIL QUALITY, STABILITY AND MOISTURE: Are fragile, compactable or unstable soils present? Are there unusual geologic features? Are there special reclamation considerations? Are cumulative impacts likely to occur as a result of this proposed action?	[N]	Soils and geology in this area are suitable for this type of water development. A limited amount of soil disturbance will occur during installation of the pipeline and tank. The pipeline will be ripped in, therefore minimizing soil disturbances. Cumulative impacts on soil resources are not expected.
5. WATER QUALITY, QUANTITY AND DISTRIBUTION: Are important surface or groundwater resources present? Is there potential for violation of ambient water quality standards, drinking water maximum contaminant levels, or degradation of water quality? Are cumulative impacts likely to occur as a result of this proposed action?	[N]	The proposed action will improve overall water quality and quantity by providing an off stream livestock water source. Water source is from an existing well located on state land. Water quantity and quality for livestock and wildlife will also be increased.
6. AIR QUALITY: Will pollutants or particulate be produced? Is the project influenced by air quality regulations or zones (Class I airshed)? Are cumulative impacts likely to occur as a result of this proposed action?	[N]	The proposed action will not impact air quality.
7. VEGETATION COVER, QUANTITY AND QUALITY: Will vegetative communities be permanently altered? Are any rare plants or cover types present? Are cumulative impacts likely to occur as a result of this proposed action?	[N]	Existing vegetation will be temporarily disturbed during construction, but it will be small scale and will naturally revegetate. The pipeline will be ripped in, minimizing disturbances to existing vegetation. Because this water development will provide a reliable source of livestock water,

II. IMPACTS ON THE PHYSICAL ENVIRONMENT

	overall livestock distribution will be improved.
8. TERRESTRIAL, AVIAN AND AQUATIC LIFE AND HABITATS: Is there substantial use of the area by important wildlife, birds or fish? Are cumulative impacts likely to occur as a result of this proposed action?	[N] The proposed action is located along the eastern Rocky Mountain front and is generally considered excellent wildlife habitat. The water development may provide various wildlife with an alternative water source. Construction activities may temporarily displace local wildlife, but no long-term impacts are expected. Overall, no long-term negative affects on existing wildlife species and/or wildlife habitat are expected.
9. UNIQUE, ENDANGERED, FRAGILE OR LIMITED ENVIRONMENTAL RESOURCES: Are any federally listed threatened or endangered species or identified habitat present? Any wetlands? Sensitive Species or Species of special concern? Are cumulative impacts likely to occur as a result of this proposed action?	[N] The proposed project is located in the grizzly bear recovery zone. The area may be used occasionally by grizzly bears. Overall, no long-term negative affects on grizzly bears and/or grizzly bear habitat are expected. There are no other species of special concern or any other sensitive habitat types associated with the proposed project area.
10. HISTORICAL AND ARCHAEOLOGICAL SITES: Are any historical, archaeological or paleontological resources present?	[N] Cultural resources will not be impacted by this proposed project. No cultural resources were found during a site inventory completed on April 25, 2008.
11. AESTHETICS: Is the project on a prominent topographic feature? Will it be visible from populated or scenic areas? Will there be excessive noise or light? Are cumulative impacts likely to occur as a result of this proposed action?	[N] The water development will slightly change the aesthetics of the landscape. There will be two water tanks present on this lease. However, this change in aesthetics is not considered significant because it is small scale and fits into the surrounding landscape and predominant uses. No other changes to the aesthetics character of the land area expected.
12. DEMANDS ON ENVIRONMENTAL RESOURCES OF LAND, WATER, AIR OR ENERGY: Will the project use resources that are limited in the area? Are there other activities nearby that will affect the project? Are cumulative impacts likely to occur as a result of this proposed action?	[N] The demand on environmental resources such as land, water, air, or energy will not be affected by the proposed action. The proposed action will not consume resources that are limited in the area. There are no other projects in the area that will affect the proposed project.
13. OTHER ENVIRONMENTAL DOCUMENTS PERTINENT TO THE AREA: Are there other studies, plans or projects on this tract? Are cumulative impacts likely to occur as a result of other private, state or federal current actions w/n the analysis area, or from future proposed state actions that are under MEPA review (scoping) or permitting review by any state agency w/n the analysis area?	[N] Currently, there are no other studies, plans, or projects associated with the proposed project area.

III. IMPACTS ON THE HUMAN POPULATION

RESOURCE	[Y/N] POTENTIAL IMPACTS AND MITIGATION MEASURES
14. HUMAN HEALTH AND SAFETY: Will this project add to health and safety risks in the area?	[N] The proposed water development will not affect human health or human safety in the area.
15. INDUSTRIAL, COMMERCIAL AND AGRICULTURAL ACTIVITIES AND PRODUCTION: Will the project add to or alter these activities?	[Y] The proposed water development will improve livestock distribution and generally improve the lessee's ranching opportunities and use of this state lease.
16. QUANTITY AND DISTRIBUTION OF EMPLOYMENT: Will the project create, move or eliminate jobs? If so, estimated number. Are cumulative impacts likely to occur as a result of this proposed action?	[Y] The proposed action will be contracted out to a local construction company. This adds to the long-term employment in the surrounding communities.
17. LOCAL AND STATE TAX BASE AND TAX REVENUES: Will the	[N] The proposed action will not affect tax revenue.

project create or eliminate tax revenue? Are cumulative impacts likely to occur as a result of this proposed action?	
18. DEMAND FOR GOVERNMENT SERVICES: Will substantial traffic be added to existing roads? Will other services (fire protection, police, schools, etc) be needed? Are cumulative impacts likely to occur as a result of this proposed action?	[N] This project will not create more demand on government services.
19. LOCALLY ADOPTED ENVIRONMENTAL PLANS AND GOALS: Are there State, County, City, USFS, BLM, Tribal, etc. zoning or management plans in effect?	[N] The proposed action is in compliance with State and County laws. No other management plans are in effect for the area.
20. ACCESS TO AND QUALITY OF RECREATIONAL AND WILDERNESS ACTIVITIES: Are wilderness or recreational areas nearby or accessed through this tract? Is there recreational potential within the tract? Are cumulative impacts likely to occur as a result of this proposed action?	[N] This tract of state land has limited recreational value for hiking, site seeing, and hunting. This tract of State Land is isolated and is legally accessible to the public. The proposed action is not expected to impact general recreational activities on this State Land.
21. DENSITY AND DISTRIBUTION OF POPULATION AND HOUSING: Will the project add to the population and require additional housing? Are cumulative impacts likely to occur as a result of this proposed action?	[N] The proposed action will not change the human population distribution or the housing requirements in the area.
22. SOCIAL STRUCTURES AND MORES: Is some disruption of native or traditional lifestyles or communities possible?	[N] The proposed action will not alter the social structure of surrounding native communities.
23. CULTURAL UNIQUENESS AND DIVERSITY: Will the action cause a shift in some unique quality of the area?	[N] The proposed action will not impact the cultural uniqueness and/or the cultural diversity of the area.
24. OTHER APPROPRIATE SOCIAL AND ECONOMIC CIRCUMSTANCES: Is there a potential for other future uses for easement area other than for current management? Is future use hypothetical? What is the estimated return to the trust. Are cumulative impacts likely to occur as a result of this proposed action?	[N] No other unique circumstances exist.

EA Checklist Prepared By: _____
Erik Eneboe

Conrad Unit Manager - CLO Date: Nov 15, 2007
Title

IV. FINDING

25. ALTERNATIVE SELECTED:	Approve the improvement request to allow the water development.
26. SIGNIFICANCE OF POTENTIAL IMPACTS:	Significant impacts are not anticipated as a result of implementing the proposed water development. This minor project is well located and will improve grazing distribution, improve water quality and improve overall management of the range land. Only minor and temporary impacts are expected to vegetation on the limited area of development.
<p>27. Need for Further Environmental Analysis:</p> <p><input type="checkbox"/> EIS <input type="checkbox"/> More Detailed EA <input checked="" type="checkbox"/> No Further Analysis</p>
